

Seychelles

Human Papillomavirus and Related Cancers, Fact Sheet 2018 (2019-06-17)

I. Key data on HPV and HPV-related cancers

Seychelles has a population of 36,541 women ages 15 years and older who are at risk of developing cervical cancer. Data is not yet available on the HPV burden in the general population of Seychelles. However, in Eastern Africa, the region Seychelles belongs to, about 4.7% of women in the general population are estimated to harbour cervical HPV-16/18 infection at a given time, and 67.9% of invasive cervical cancers are attributed to HPVs 16 or 18.

Table 1. Crude incidence rates of HPV-related cancers

	Male	Female
Cervical cancer	-	-
Anal cancer	0.0	0.6
Vulva cancer	-	1.1
Vaginal cancer	-	3.4
Penile cancer	1.1	-
Oropharynx	-	-

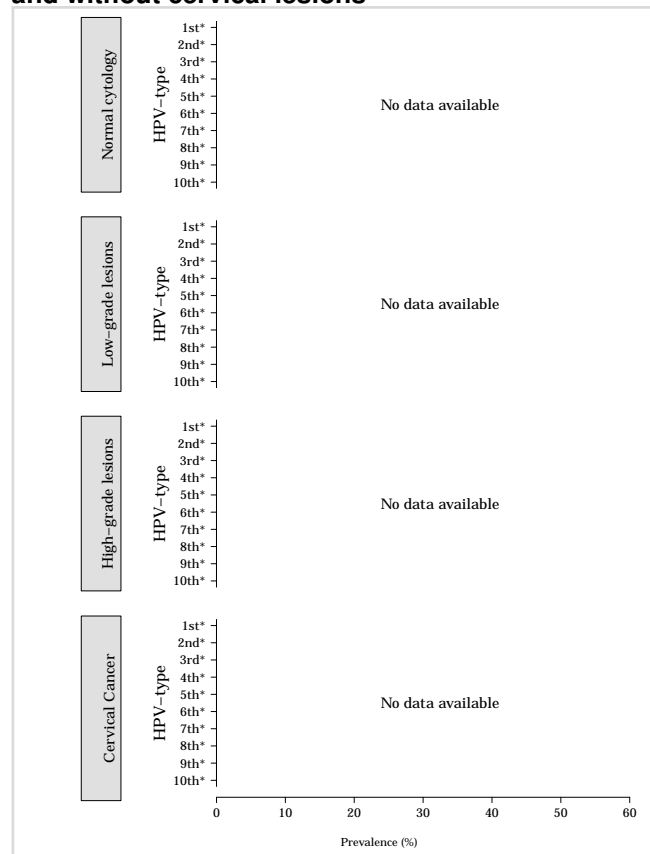

Table 2. Burden of cervical cancer

	Incidence	Mortality
Annual number of new cases/deaths	-	-
Crude rate	-	-
Age-standardized rate	-	-
Cumulative risk 0-74 years (%)	-	-
Ranking of cervical cancer (all years)	-	-
Ranking of cervical cancer (15-44 years)	-	-

Table 3. Burden of cervical HPV infection Seychelles

	No. Tested	% (95% CI)
HPV prevalence in women with normal cytology	-	-
HPV 16/18 prevalence:		
Normal cytology	-	--
Low-grade cervical lesions	-	--
High-grade cervical lesions	-	--
Cervical cancer	-	--

Figure 1. Comparison of the ten most frequent HPV oncogenic types in Seychelles among women with and without cervical lesions

*No data available. No more types than shown were tested or were positive.

Seychelles

Human Papillomavirus and Related Cancers, Fact Sheet 2018 (2019-06-17)

II. Complementary data on cervical cancer prevention

Table 4. Factors contributing to cervical cancer (co-factors)

Smoking prevalence (%), women	9.0 [5.8-12.3]
Total fertility rate (live births per women)	2.3
Hormonal contraception use (%) (pill, injectable or implant), among women	-
HIV prevalence (%), adults (15-49 years)	-

Table 5. Sexual behaviour

MEN	
Percentage of 15-year-old who have had sexual intercourse	-
Range of median age at first sexual intercourse	-
WOMEN	
Percentage of 15-year-old who have had sexual intercourse	-
Range of median age at first sexual intercourse	-

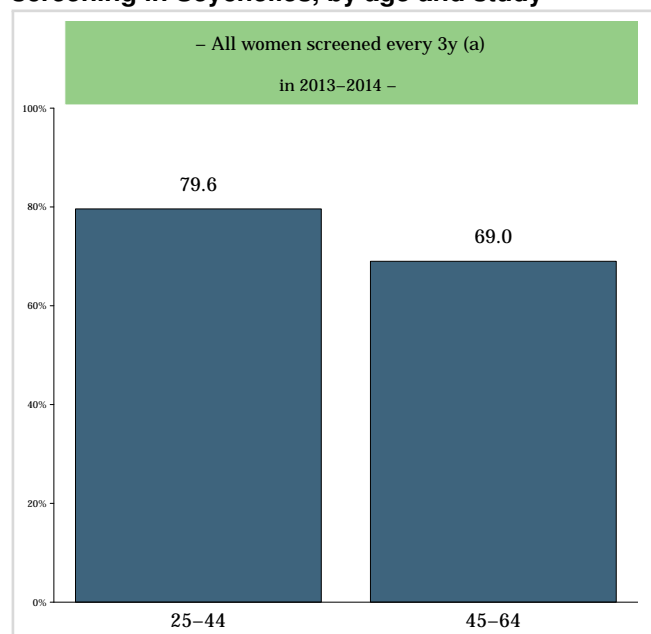

Table 6. HPV vaccine introduction

HPV vaccination programme	National program
Date of HPV vaccination routine immunization programme start	2014

Table 7. Cervical screening practices and recommendations

Cervical cancer screening coverage, % (age and screening interval, reference)	74.6% (All women aged 25-64 screened every 3y, NHS of NCD 2013-2014 Seychelles)
Screening ages (years)	Sexually active (not specified age)
Screening interval (years) or frequency of screens	2 years

Figure 2. Estimated coverage of cervical cancer screening in Seychelles, by age and study

^a Proportion of women in the total sample of the mentioned age range in the country or region that reported having a Pap smear during a given time period (e.g., last year, last 2, 3, 5 years or ever).
